Experience

Front-end Developer at Actum Digital
5 months 01.2022 – 06.2022

I have risen to the opportunity to become the leader of the Front-end smaller team in the current project.

Was responsible of reworking core business product and developing three small projects that are the eco-system of our core product.

Make web application SEO friendly and familiar with GoogleTag Manager.

Mentoring less experienced colleagues and provide code review.

Took a part of implementation CI/CD pipeline,optimization of Webpack configuration.

Also made use of ESLint, Prettier and Husky to improve the quality of our code.

Work with lots of various technology.I have learned how to manage Azure DevOps, CMS Kentico Experience.

Front-end Developer at Actum Digital
9 months 04.2021 – 01.2022

I have worked on a project offering yacht rental. I used WordPress extensively, developing a custom theme for it, and integrating it with other tools.

I work as a productive and positive team member to design,code, test, report, and debug operations.

Managed front-end development and workflow processes. (Project was developed on React with Flow typing).

Successfully identified, diagnosed and fixed web application problems.

Helped to achieve a consistent look and visual theme across the web by promoting uniform fonts, formatting, images, layout, creating new components and improving existing ones.

Worked to assess competing web sites in regards to content,look and feel.

Freelance Developer

1 years 1 months 03.2020 - 04.2021

I spent a lot of time working on smaller web dev projects. An occasional website for a friend of a friend.

> Learned the basics of lots of non-development skills. Learning how to manage my time and simple project management was invaluable in my professional career later.

> Worked with lots of various technologies. I've learned how to manage DNS and Linux servers and worked on applications written in PHP, JavaScript, and Python.

Skills

Front-end development   ∗∗∗∗

I've spent all of my career doing this. Naturally, I consider this is my top skill.

`TypeScript` `React` `Redux` `SCSS` `Webpack`

Automation and DevOps   ∗∗

Took a part of implementation CI/CD pipeline in Actum Digital (yachting.com - project). As well configure a pipeline for pet project wit GitHub Actions.

`Docker` `Azure` `Circle CI` `GitHub Actions`

Mobile development   ∗

Very basic understanding, but I'd like to learn more.

`React Native`

Projects

dunayeu.me

This very website you've found this resume on. Intended to be a showcase of my technical skills. Built using React, TypeScript, JSS, and Next.js.

command-executor   https://github.com/stupendusmagneficus/command-executer 🔗
